

# insurity SpatialKey | Client for Windows Quick Start Guide

Welcome to the SpatialKey platform! This Quick Reference Guide will walk you through how to install an application called SpatialKey Client for Windows, which is a lightweight desktop app that will enable you to access some parts of the SpatialKey platform.

Hopefully, you've already been added to your SpatialKey site and set up with your login credentials. Whenever you log in and use the platform, you'll log in via a browser (e.g. [mysite.spatialkey.com](https://mysite.spatialkey.com)). Most of what you do in the platform can be done directly in the browser, but a few things will require SpatialKey Client for Windows.

Please reach out to your account manager or [support@spatialkey.com](mailto:support@spatialkey.com) with comments or questions.

## Getting started with SpatialKey Client for Windows

### What is SpatialKey Client for Windows and how does it work?

SpatialKey Client for Windows is a lightweight desktop app that gets installed on computers where you will be accessing the SpatialKey platform.

SpatialKey Client for Windows can be easily installed by you or your organization's IT department. Once installed, SpatialKey Client for Windows will be available to launch whenever needed. You'll still access all your SpatialKey applications via a browser like you do today, but when you navigate to an application that requires SpatialKey Client for Windows, it will be automatically launched for you.

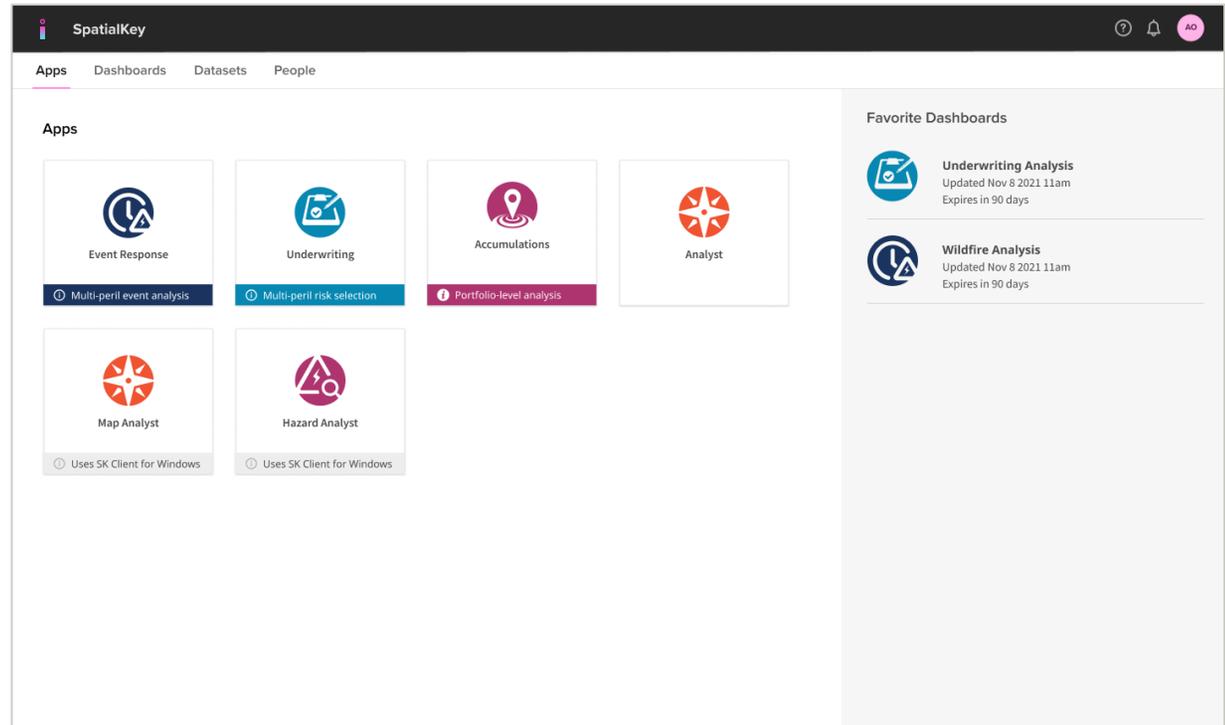

### Why do I need to install SpatialKey Client for Windows?

SpatialKey Client for Windows enables a few SpatialKey applications, including **Map Analyst** and **Hazard Analyst**, to run. These apps still use Adobe Flash, a technology which is no longer supported by browsers.

### Underwriting, Accumulations and Event Response

applications launch in the browser and do not require SpatialKey Client for Windows.

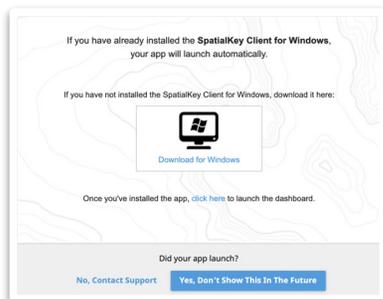

Note, depending on what applications your organization licenses, the above list may look different.

**TIP!** Applications that will open in SpatialKey Client for Windows can be identified by a "Uses SpatialKey Client for Windows" label on the application.

## How to enable SpatialKey Client for Windows

You'll be prompted to download and install SpatialKey Client for Windows on your workstation the first time you click on an application with a **"Uses SpatialKey Client for Windows"** label. Follow the steps in the installer to complete the installation.

Pre-requisites:

- Windows operating system
- Chrome, Firefox, or Edge browser

Note: In order to ensure that the latest version of SpatialKey Client for Windows is installed, the system will perform a check each time it is opened.

**After you've completed the installation steps above...**

Click on the **Map Analyst** application to launch a dashboard. A window will appear outside of the browser with your dashboard, which will indicate that your installation of SpatialKey Client for Windows was successful.

That's all! You've successfully installed SpatialKey Client for Windows. Please reach out to your account manager or [support@spatialkey.com](mailto:support@spatialkey.com) with comments or questions.

**TIP!** Dashboards that use SpatialKey Client For Windows appear in a window outside of your browser. Multiple dashboards can be open in SpatialKey Client for Windows concurrently.
