## Reask Hurricane Wind

Reask is a science and technology company applying cutting-edge data science techniques to natural hazard modelling. Reask offers real-time, post-event, and longer-term AI solutions for global weather-related catastrophes.

**Coverage area & data available**
- Global
- Wind speed

**Update frequency**
Event data is updated daily during an event.

**Columns**
We enhance your data with columns you can filter by & export:

Wind 50p (Reask)[Date/Time]
Wind 90p (Reask)[Date/Time]

When you download your enhanced data, look for the column that starts with the "Provider Name", then the "Peril Name", and ending with the "Provider Version". For example, "Reask Wind 20230810".

# Reask Hurricane Rainfall

Reask is a science and technology company applying cutting-edge data science techniques to natural hazard modelling. Reask offers real-time, post-event, and longer-term AI solutions for global weather-related catastrophes.

## Coverage area & data available
- Global
- Rainfall depth

## Update frequency
Event data is updated daily during an event.

## Columns
We enhance your data with columns you can filter by & export:

Rainfall 50p (Reask)[Date/Time]
Rainfall 90p (Reask)[Date/Time]

When you download your enhanced data, look for the column that starts with the "Provider Name", then the "Peril Name", and ending with the "Provider Version". For example, "Reask Rainfall 20230810".
