

Distance To Coast

In the changing methods of risk management, one metric has continued to remain of utmost importance: Distance to Coast. Risks from wind, flooding and coastal hazards have always had a strong correlation with the nearness of the coastline. Even more so now with the rise of sea level and increases in storm intensities.

Maprisk's Distance To Coast report provides fast and accurate measurement from your point of interest to the coast.

Coverage Area

- US states with a coastline

Reports Available

- Standard
- Distance to Coast plus Inland Waterways

Report Details

We enhance your data with attributes you can view, filter by and export:

- Overall Rank
- Distance to Coast

Overall Rank Categories

- < 1/2 mile
- 1/2 - 1 mile
- 1-5 miles
- 5-10 miles
- > 10 miles
