

## Flood

Impact Forecasting is Aon's catastrophe model development center of excellence whose seismologists, meteorologists, engineers, mathematicians, finance risk management and insurance professionals analyze the financial implications of natural and man-made catastrophes around the world. Impact Forecasting's experts develop a suite of probabilistic and scenario models.

### Coverage Area

- Canada, Czech Republic, Poland, Slovakia and Switzerland

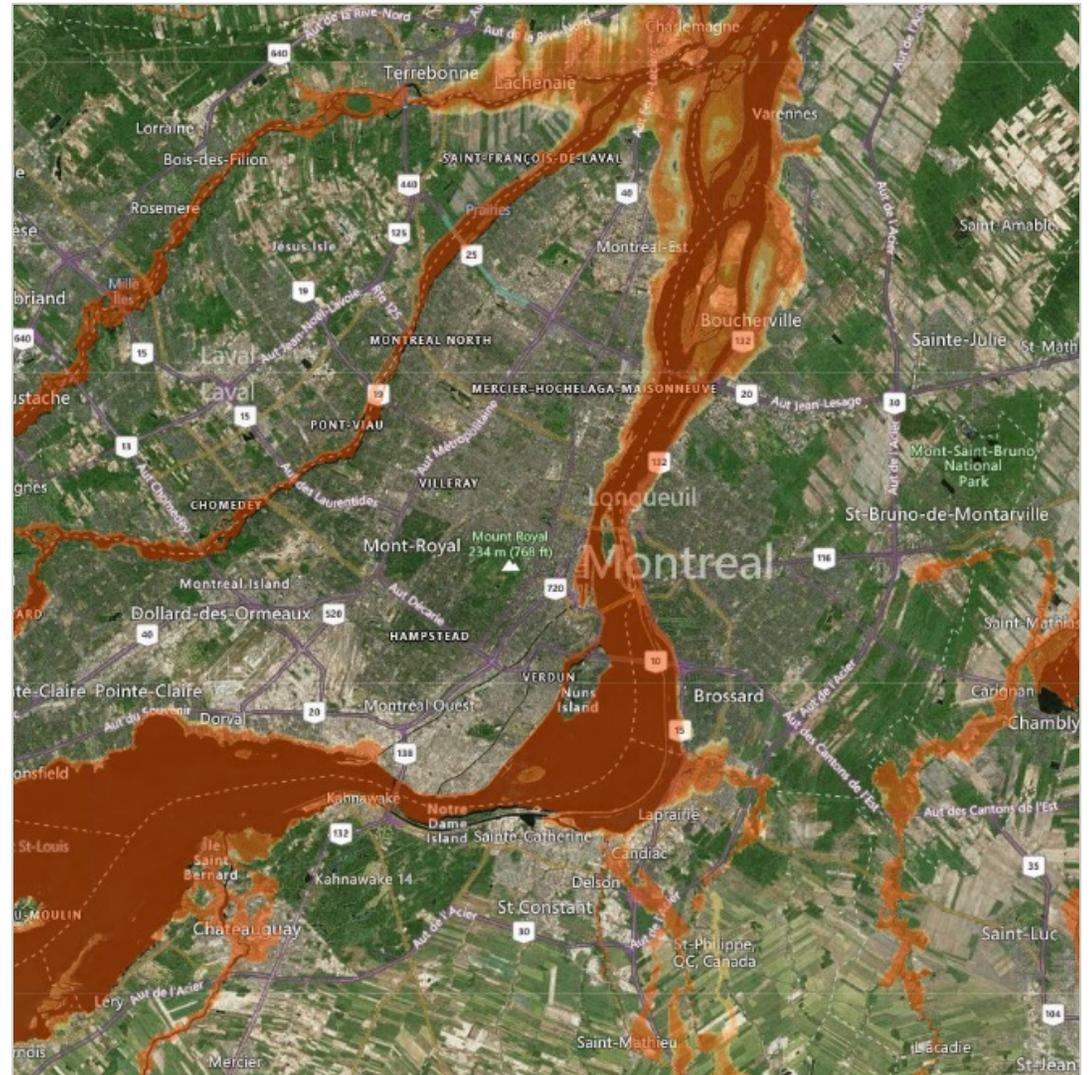

### Report Details

We enhance your data with attributes you can view, filter by and export:

- Overall Rank
- Overall Risk Score
- Return Periods
  - 1:20 depth
  - 1:50 depth
  - 1:100 depth
  - 1:250 depth
  - 1:500 depth
  - 1:1000 depth

### Overall Rank Categories

- High
- Medium
- Low
- Minimal

Data from Aon Impact Forecasting requires an existing relationship before data can be available and consumed within Insurity Geospatial
