

Wildfire

The wildfire hazard potential (WHP) map is a raster geospatial product produced by the USDA Forest Service Fire Modeling Institute that can help to inform evaluations of wildfire hazard or prioritization of fuels management needs across very large landscapes. The specific objective with the WHP map is to depict the relative potential for wildfire that would be difficult for suppression resources to contain.

Coverage Area

- United States

Reports Available

- Contiguous US
- Alaska
- Hawaii

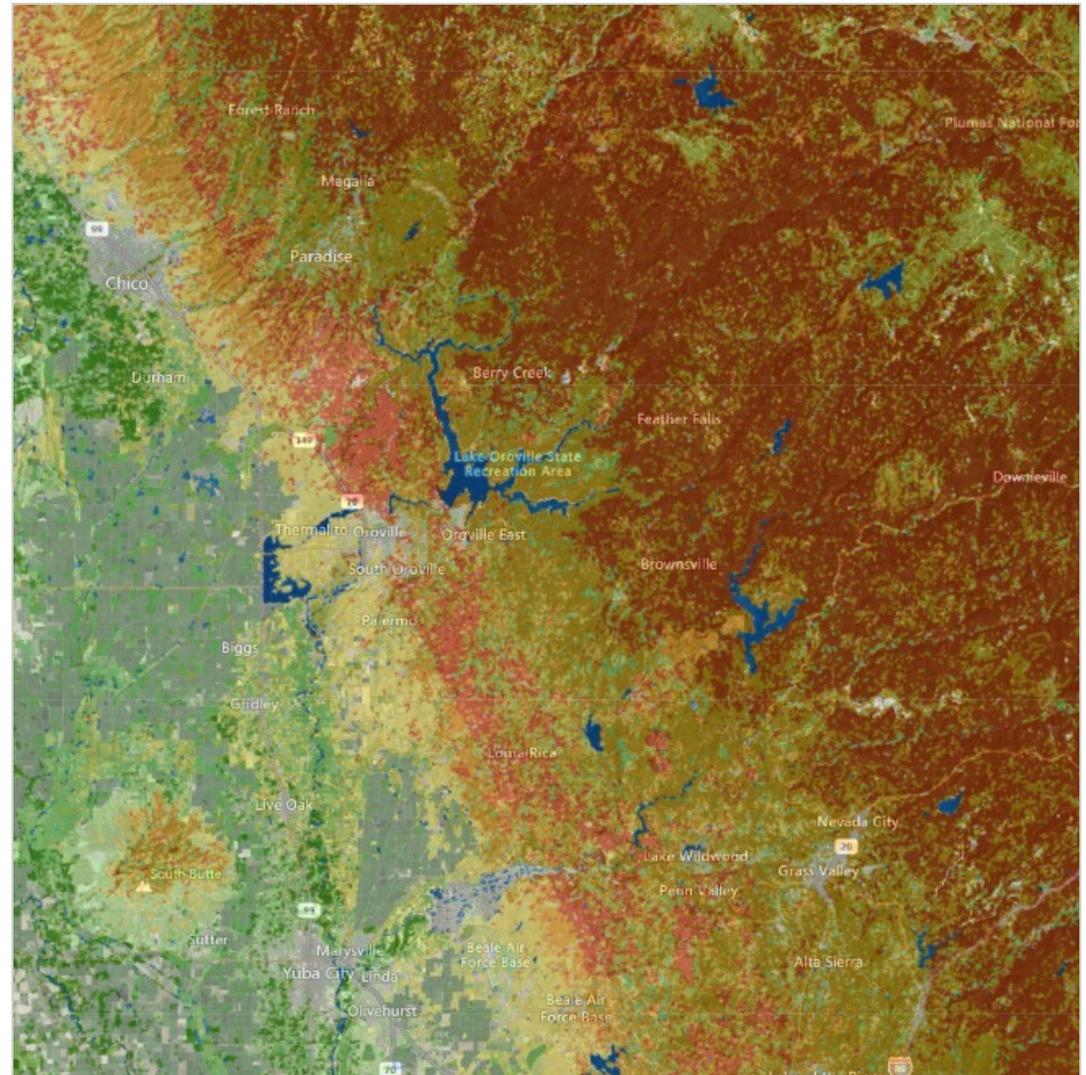

Report Details

We enhance your data with attributes you can view, filter by and export:

- Overall Rank
- Wildfire Hazard Potential

Overall Rank Categories

- Very High
- High
- Moderate
- Low
- Very Low
- No Risk
